Pharma Industry

A ProfilGate 3x4 "b55" installation helps to contain moisture, dirt and dust at the entrance and stop it from spreading throughout the plant; helping to keep the floors clean and hygienic.

Pharma Industry

A ProfilGate 5x5 “b65” installation with blue brush strips prevents dirt to spread within the production area.

Pharma Industry

Three ProfilGate “b55” installations protect the company’s warehouse from dirty floors. This solution is recommended for junctions and facilities with more than one forklift route.

Pharma Industry

A ProfilGate 3x3 “b45” installation in a loading platform saves space and is a perfect way to clean all wheels before entering the facilities.

Pharma Industry

A ProfilGate 1x3 “b65” installation with blue brush strips covers the floor between the production area and logistic center. Dirt is collected in the ProfilGate trays before getting into sensible areas.

Pharma Industry

At a palette transfer station ProfilGate removes dust and dirt from the forklift wheels, before a Dycem sticky mat gets rid of the fine dust. This combination is a perfect solution for all extreme dirt sensible areas, such as clean rooms.

Pharma Industry

Positive side effect: ProfilGate also extends the lifetime of the Dycem sticky mat. ProfilGate takes of coarse dirt that, in large amounts, would destroy the mat.
